General features

Ideal for logistics applications:
• BRR-LA has a slick design, is small and lightweight (Fits neatly in one hand and can be easily attached to a belt via the key reel accessory).
• Very reliable, efficient, durable.
• Thanks to its PDA stylus, BaracodaRoadRunners can also be used as a stylus on PDA.

Rugged product
RoadRunners, with its 3 mm of plastic casing protected by an additional layer of elastomer and the optional protective boot, is particularly adapted for harsh environments and remains fully functional even after numerous drops onto concrete.

Extremely durable batteries
BRR-LA delivers more than 10,000 scans over 48 hours of continuous use.
Battery monitoring possible: Visualise in Real Time from the Mobile Device the battery level status of the RoadRunners (Fuel Gauge)

Superior reading quality
Can complete 100 scan per second and decode damaged or low quality barcodes. Thanks to its HD technology, it is very aggressive on very small 2D barcodes.

No Data Loss mode and Auto Reconnection:
When RoadRunners is connected to a host, scanned barcodes are transmitted in real time to this host. Barcodes are stored within internal memory until they are ackowledged by the application.
If you scan barcodes out of the radio range, they will be stored in memory and automatically downloaded when getting back into range.

Internal time clock
Every barcode can be Date and Time stamped.

Batch mode:
If used in batch mode, RoadRunners can store up to 10000 UPC barcodes with timestamp.

Intuitive user interface:
• Same button to switch on, connect and scan barcodes.
• Multi color led for connection and battery status.
• Sound beeps for successful scanning (Loud volume option available for noisy environment).

Platforms compatibility:
Baracoda provides a user-friendly middleware (BaracodaManager) and also supplies developers with state of the art APIs to ease the integration platforms: PC ; PPC 2002/2003; WM5; CE.NET; Palm OS, Symbian serie 6 (Mobile Phones) and Java phones (Blackberry and JSR82)

Plug and Scan Solutions
For instant replacement of corded scanners, Baracoda supplies advanced Bluetooth Serial (RS232) and USB adapters with its wireless scanners. Just plug & scan - there is no need for driver installation.
